

Encapsulation

^

```
class Book
  attr_reader :name, :year, :price
end

def initialize(name, year, price)
  @name = name
  @year = year
  @price = give_discount(price)
end

def show_data
  puts "Book Name: #{@name}\nYear: #{@year}\nPrice: #{@price}"
end

private
def give_discount(price)
  if @year < 2000
    price -= 5
  else
    price
  end
end
end
```

→ will call the private method

→ Just can be call inside Book class
